

Step #6:

Elect Your Public Officials

At every level of governance, we elect fiduciaries to whom we entrust the protection of our bodies and our property. They have no other responsibility to us. So, elect competent and transparent officials who are knowledgeable of their constitutional limitations to prevent government overreach. Hold them accountable at every level—Town. County. State. Federal.

Step #7:

Direct Your Public Services Employees

State of State. Constitutional Contracts. What we won't be paying for: What services we will do ourselves:

Step#8:

Perform Your Self-Governing Duties

To sustain our right to a republican form of government, every American has an obligation to perform these duties:

- Serve as a Juror when called upon
- Partake in the Militia in time of need
- Report Crime. Be not complicit by silence or apathy.
- Keep the Peace. Do no harm.
- Obey the Public Law.

Step #9:

Stay on Watch

Watch the Henhouse. Stay on Ratwatch. Keep watch on your American Public Officials, their subcontracted Territorial British government and Municipal Government private corporate employees.

Self-Governance

You have heard those words before but most likely never thought much about what they mean or imply.

Stop a moment right now.

Realize that you have been standing around letting other people govern you all your life.

After your parents and your pastors and your teachers came the politicians and the bureaucrats and the agency goons. They all taught you to obey and comply and fear punishment if you didn't. Chances are you have never learned much, if anything, about self-government— and the idea that it is a legitimate and safe alternative to a life of enslavement is probably foreign to you..... **but it is true.** It's what you are guaranteed, if you choose to exercise that option and take responsibility to self-govern your world— beginning with your self. The reason you don't have control is that **you** are Missing in Action, lost at sea.

You are supposed to be self-governing, deciding everything, declaring your political status, assembling your State Assemblies, staffing your own courts and jury pools, manning your State militias.

Yeah, **you.** There on the couch.

So the rest of us woke up and found the keys to the insane asylum doors. We are doing what needs to be done. We are self-governing and peaceably ending the Corporate Feudalism that was planned for us. We are taking back the rights by accepting the responsibilities.

But where are you? Still sitting on the couch?

If you want freedom— actual freedom— and you want to come home to an America you recognize, a place where sodomy is not taught to four year-olds in school, and where you pay for your own lunch, hey, if that sounds good....Welcome home.

If you are sick and tired of the Swamp and the Swamp Creatures and the Night of the Living Dead Parrot-time "News" casts, and all the rest of it— stand up.

Get off the couch. Do your part. Think. Act. Correct your political status records. Join your State Assembly. Contribute. Self-govern.

9 Steps Americans Need to Take to Self-Govern

Step #1: Declare Yourself an American

Millions of Americans have been arbitrarily identified as "United States Citizens" and/or "citizens of the United States" and assigned "births" as "commercial vessels" in the British Crown's Merchant Marine Service. This results in the establishment of an ACCOUNT dba your FIRST MIDDLE LAST name and more recently your FIRST M.I. LAST name and the presumption that you, the living man or woman, are the Account Holder responsible for administering these ACCOUNTS as good and faithful Warrant Officers of Her Majesty. All you really need to claim back your identity, your name, your DNA, your political status— all the crucial and universal elements — are in the 1779 Declaration.

The only paperwork necessary to declare yourself an American consists of four (4) pages:

- (1) 1779 Declaration;
- (2) a black and white copy of a birth certificate or naturalization paperwork; and
- (3) two competent Witness Statements affirming that you are the man/woman who was born at the time and place indicated on the birth certificate

Returning America to Our Rightful Land and Soil Jurisdictions

Step #1: Declare Yourself an American continued

You take these documents and record and publish them on the public record at either the:

- (1) Global Family Group's International Lawful Land & Soil, Recording & Publishing System (LRPS) ;
- (2) County or State Assembly Land Recording Office (LRO);
- (3) County Recorder's Office; or
- (4) publish them three times within three months in a local newspaper.

Step #2: Cancel Your Voter Registration

"Voter Registration" is one of the chief means that our federal United States Subcontractors use to claim that we are "US citizens." and subject to them and their corporate rules. You are not a shareholder in the US Corporation, you are not employed by the federal government or their subcontractors. Write to the local "Voter Registration Office" and tell them that you made a mistake. You aren't a "US citizen" nor a "U.S. Citizen" — you are an American State National — and you rescind your signature on their records and forms accordingly.

Step #3: Assemble Your Towns people

In our Bill of Rights, the First Amendment guarantees us freedom of religion, speech, press, assembly, and petition. This is what is meant by a republican form of government—to "self- govern." It's one of our protected, natural rights. What it doesn't mean, is a right to protest. You begin by calling a meeting with the townspeople to start the conversation about what is wrong with our "government" and how will you begin to direct what goes on in your community as "we the people."

Step #4: Declare Your Self-Governance as an "American Town"

Our American towns are missing. It is our responsibility and duty to reconstruct them so that we can return to our republican form of self- governance. When you declare yourself an American you acquire your constitutionally guaranteed "right to assemble."

Step #5: Take Back Your Land and Postal Areas

All of our land in America has been purloined by our Employees, the United States government, alleging false claims of abandonment. They claimed we were in interregnum after the end of the mercenary conflict that left our eastern States devastated. Then they stole our land and State Trust assets.
